

storm outdoor bannerstand

user instructions

System is suitable for outdoor use in moderate winds

1

Kit includes : 4 in-line connection rods,
4 banner support rods, base, bracing bar and carry bag

2

Fill the base with either water or sand
(Ensure the top is tightened securely)

3

Push fit both shorter banner support rods
into either side of the base

Technical Specification

Overall assembled size :
2000mm (H) x 620mm (W) x 830mm (D)

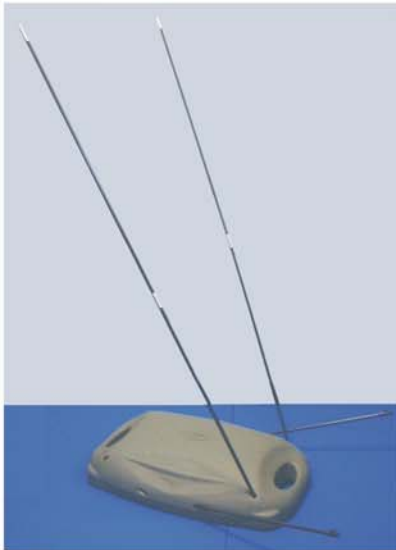

Approx unit weights :
5.5kg (empty base) 17kg (base full of water)

Carry bag size : 700mm x 450mm x 120mm

Banner visible graphic size :
1800mm (H) x 620mm (W)

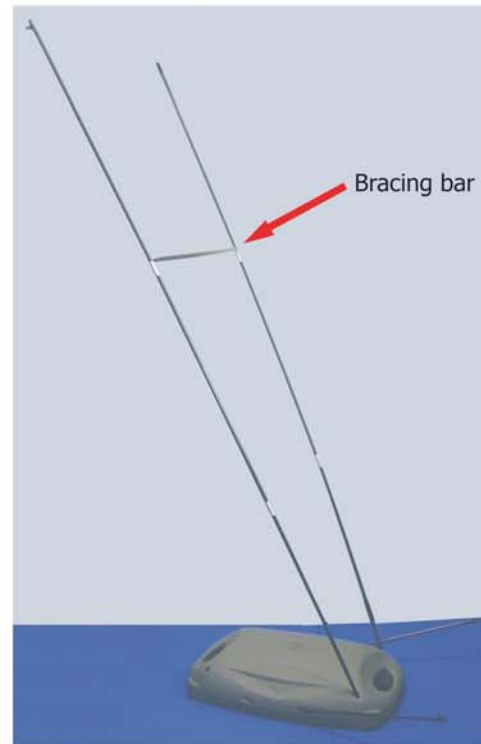

Eyelet positions :
1730mm x 560mm (between centres)
Recommend 1/2"(13mm eyelets)

4

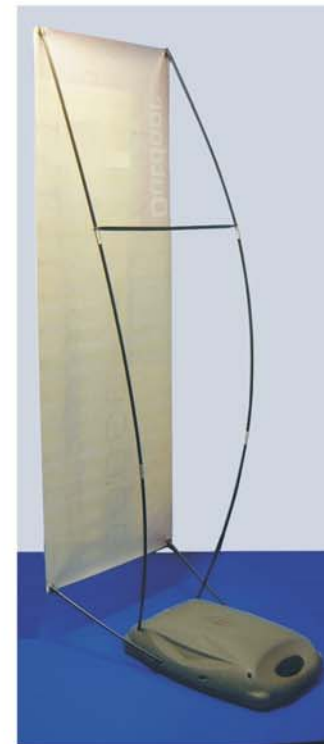

Construct the in-line connection rods
and fit into the top of the base

5

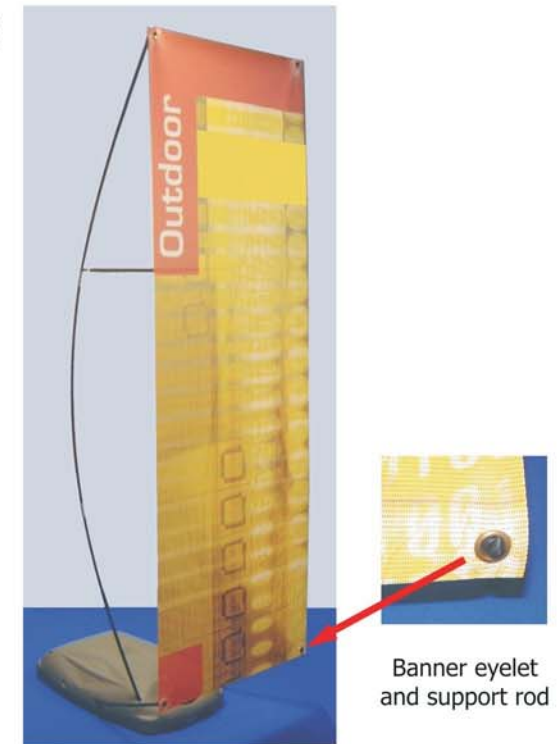

Fit the bracing bar, sandwiching it between
the in-line connection rods and the longer
banner support rods to complete the frame

6

Fit the shorter banner support rods
through the eyelets at the base of the banner
Push the frame forward to bring it into tension

7

Finally fit the longer support rods
through the eyelets at the top
of the banner to complete
(Repeat from step 3 for double sided versions)
