

kit includes : 2 telecopic poles, stabilising foot,  
2 top rails, 2 bottom rails, wrap and carry case

Lock both bottom rails onto the stabilising foot  
Push the foot into the rail recess and  
slide along the rail until it locks into position

Slot both telescopic poles into the stabilising foot

### **Technical Specification**

Suitable for graphic thicknesses between 220 & 350 microns  
Visible graphic area : 2200mm (H) x 600mm to 1500mm (W)  
depending upon version supplied  
Unit weight : 4.5kg approx

Loosen both telescopic pole connections  
ready to extend the graphics

Carefully unroll each graphic and secure into  
position by locating the top rail hole with  
the opposite telescopic pole

Finally raise the telescopic poles to extend  
the graphic and lock into position  
Note how the poles cross to  
provide a self supporting structure
