

A typical 3 x 3 kit includes : original popup frame, 18 original magbars, 3 front hangers and kickers and two 'D' end hangers
(Note : Elipse transit case is not included)

Fit each magbar into the centre two square holes of the popup frame nodes
Clip both ends of firmly into place

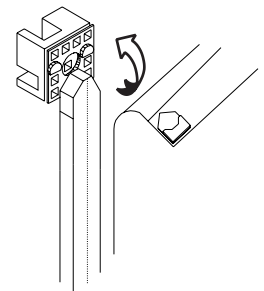

Take the inner nodes of the popup and with a throw action open out the frame

Magbars should run vertically
(4 lines across the front of the frame and 2 lines on each side at the rear)

Lock the popup frame locking arms into position

Finally unroll each panel and locate the plastic hanger hook onto each frame stud
Line up the panel edge with the centre of the magbar

Technical Specification (3 x 3 curved)

- Assembled size : 2235mm (H) x 2540mm (W) x 685mm (D)
- Unit weight inc transit case : 17.5kg approx
- Single magbar weight : 0.2kg approx
