

kit includes : telescopic pole, 3 stabilising poles, 2 rigidisers, 2 top rails, wrap and carry case

Screw the 3 stabilising poles into the telescopic pole to form the base

Attach top rail over the top of the telescopic pole and adjust until the hole in the rigidiser can be hooked onto the pole stud

Extend the telescopic pole ready to accept the banner graphic

Finally adjust telescopic pole until the banner graphic is in tension
Repeat process for 2nd banner

Technical Specification

Suitable for graphic thicknesses between 200 & 400 microns
Visible graphic area : 2200mm (H) x 600mm to 1000mm (W)
depending upon version supplied
Unit weight : 3kg approx
