

kit includes : bungee pole, 2 top rails, doubler, base unit & carry case

Lean the unit backwards and extend both graphics by pulling up each top rail until the complete image is visible

Remove the three part bungee pole from the base unit
Construct the bungee pole and slot into the base unit

Fit doubler into the top of the bungee pole

Technical Specification

Visible graphic area : 2200mm (H) x 600mm to 1500mm (W)
depending upon the version supplied

Note : Add 200mm to graphic length to allow for the roller
Unit weight : 8kg approx

Guidelines for Graphic substrates

- 1, Material thickness must be between 225 and 300 microns in total
- 2, The substrate must be pliable and suitable for roller bannerstands
- 3, After fitting, the graphic should be left for 24 hours before use to ensure the adhesive bonds sufficiently

Finally secure both graphics into position by locating each top rail hole with the bungee pole doubler
Take care when lowering banners (do not drop) to prevent damage to graphics
